

Equipment Hire

Industrial Ovens

Thermal design and manufacture a wide range of industrial drum ovens. The standard 4 drum oven is available for hire.

All Thermal ovens come with full insulation, robust construction and a portable free standing design.

Thermal ovens provide an efficient method of heating your products by minimising heat loss and aiding air distribution throughout the unit.

Drum Heater Jackets

Thermal offers a simple, inexpensive and safe way to heat standard 205L (44 gallon) drums without having to build a hot room. Thermal's heater jacket zips up to form a miniature hot room around the drum and plugs into 240V power.

With the zip up design, our heater jackets ensure minimal heat loss from the drum ensuring a fast and efficient heat up time.

**Minimum 10 day hire.

Equipment Hire

Hot Boxes

The Centrifugal Hot Box air blower heater incorporates a single speed fan which provides a continuous flow of air at relatively low noise levels, enabling the heaters to be used for comfort heating and ventilation in a variety of situations.

Supplied with castor wheels, the 21kW Hot Box unit is portable and easily moved to the area where it's needed most.

Load Banks/Dummy Loads

Thermal offers resistive load banks to be used in various situations, including the testing of back up power systems and generators.

Load banks can provide regular load testing without interruption to the main power supply and ensuring the backup system is working and reliable.

Load banks can be made to the customers specifications or a simple centrifugal Hot Box unit (shown above) is also capable of being used as a dummy load.

Minimum 10 day hire.
