

HOTBOX

CENTRIFUGAL

The **Centrifugal Hot Box** fan heater incorporates a single speed fan which provides a continuous flow of air at relatively low noise levels, enabling these heaters to be used for comfort heating and ventilation in a variety of commercial/industrial situations as well as process heating applications.

Features

HBC Series fan heaters include the following features:

- HBC units are supplied with castors for ease of movement and can be coupled to ducting systems
- A 240V 165W electric motor delivers 475 litres per second
- Two stage heat output:
10.5kW low setting and 21kW high setting
- HBC units can be run with fan only for air movement and ventilation
- Over temperature safety cut out and manual reset button:
Note: The temperature of intake air should not exceed 40°C
- Fan run on timer
- Contactors and selector switch, internal wiring, all provided complete with a 2.5m long flexible lead terminated with a 3 phase 5 pin 32 amp plug
- Low watt density stainless steel finned air heating elements for long life
- Three phase, four wire Star connection
- Powder coated finished unit, which measures 660mm long x 480mm wide x 700mm high
- Weighs approximately 50kg
- Different wattages available on request

Part #	Loading kW	Amps/Phase	Unit Voltage	Air Temp Rise °C	
HBC21415	21.0	29.2	415	10.5kW 13°C*	21kW 27°C*

* Dependent on application

Optional Extras

- Ceiling or wall mounting bracket
- Thermostat
